OBJECTIVE

Motivated aspiring Software Engineer with a strong foundation in Computer Science Engineering. Knowledgeable in Java and Web Development with interest in building efficient applications. Looking for an opportunity to contribute my skills and learn in a growth-oriented environment.

EDUCATION

Bachelor of Engineering in Computer Science

Engineering

V S B College of Engineering Technical Campus,
Coimbatore

CGPA: 8.83 / 10

Year: 2023 – 2027

Class XII (Higher Secondary)

Nagamani Ammal Matric Higher Secondary School,

[Board - State Board]

Percentage: 81.5%

Year: 2022 – 2023

AREA OF INTEREST

Full Stack Development – Building scalable web applications using the MERN stack and Java technologies.

TECHNICAL SKILLS

Languages: Java, JavaScript,

Tools: Git, GitHub, VS Code, Excel

Frontend: HTML, CSS, React.js

Concepts: OOP, DBMS, OS, Data Structures

Backend: Node.js, Express.js

AI Tools: Prompt Engineering Basics

Database: MongoDB, SQL

PROJECTS

Project Title: Real-Time Chat Application

Technologies: MongoDB, Express.js, React.js, Node.js, Socket.IO

Developed a scalable real-time chat application using MERN stack and Socket.IO with JWT authentication. Implemented live messaging, typing indicators, and instant notifications with responsive UI design.

Project Title: Personal Expense Tracker

Technologies: MongoDB, Express.js, React.js, Node.js

Built a full-stack expense tracking application with CRUD operations and secure authentication. Designed interactive dashboards for expense visualization and user-friendly financial management.

INTERNSHIP

Service Now – Virtual Internship

Duration: Feb 2026 – Apr 2026

Learned ServiceNow fundamentals and basic administration, including user and role management. Worked on ITSM processes like incident management and service request workflows.

Viruzverse – MERN Internship

Duration: Dec 2025 – Jan 2026

Completed a MERN stack internship, gaining hands-on experience in full-stack web development. Built an expense tracker application with CRUD operations and responsive UI.

CERTIFICATIONS

- **Amazon Junior Software Developer** – Coursera
- **Data Science & Analytics** – Future Interns
- **Android Development** – Prodigy InfoTech
- **Machine Learning** – Codsoft
- **Crash Course on Python** – Coursera
- **Secure Computing** – Brain Trainers Academy
- **Big Data Computing, Edge Computing** – NPTEL

PATENT

Fault prediction in computer using IoT and ML algorithms

Developed an IoT-enabled fault prediction system using Machine Learning algorithms for proactive hardware failure detection and real-time monitoring.

POSITIONS OF RESPONSIBILITY

Class Representative

Participated in Organizing Multiple Events

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge and belief.
